SPORTS SURFACES & PITCH SURROUNDS

## **Nova Sport: A sporting star since 1987**

**Nova Sport Limited, one of the UK's leading synthetic sports surfacing companies, has been installing sport and play surfaces since 1987.**

We have established an enviable reputation with local authorities, parish councils, sports clubs, football clubs, hospitals and schools for providing a range of sports surfaces, pitch surrounds and play areas that are as visually impressive as they are technically outstanding.

Our surfaces are manufactured from a combination of rubber granules bound with polyurethane, which are individually tailored for each project.

Our surfacing solutions suit any budget, from a single court to a full size pitch, and our broad experience enables us to construct ideal solutions for your needs, however precise. We now also offer a variety of pitch surrounds, lighting and perimeter fencing, making us your one-stop shop for sports surface installations from the ground up.

SPORTS SURFACES & PITCH SURROUNDS

## MUGAs and Courts: The foundations of perfect play

Nova Sport specialises in creating polymeric pitch surrounds, courts, athletics surfaces and MUGAs (Multi Use Games Areas), ideal for maximising the available space at your facility whilst in no way compromising on quality.

Our installations are of such a high standard that we offer Sport England performance surfaces for all of our MUGAs, including Type 4 polymeric.

Our surfaces are manufactured from a combination of rubber granules bound with polyurethane, which produces a strong, durable sports finish. The top coat consists of a coloured elastomer and fine EPDM rubber granules, combining durability and shock absorbency, which produces a surface suitable for a variety of sports. This system satisfies both **Sport England** and **SAPCA** guidelines.

Durable coloured line markings are then added for that finishing touch.

We also provide superb synthetic grass pitches and courts - just ask us for more information.

## In Need of Refreshment?

Reinvigorate your courts and MUGAs with a new lease of life.

If your existing polymeric surface is looking tired, dated or just in need of a little TLC, we offer spray coating of surfaces to inject new life into your hard-working facility.

We can re-spray to enhance, protect and improve the playing characteristics of the court, or simply refresh lines and markings, whatever the sport.

## Added extras to complement your new surface

We don't just provide sports surfaces that are known for their superior quality, we also offer:

- **FENCING**
- **LIGHTING**
- **MAINTENANCE**

Ensuring the court is properly enclosed and well lit (critical for MUGAs for optimum versatility) is essential to minimise downtime and maximise safety.

**Ask about our custom lighting solutions.**

**Ask about our pitch perimeter fencing.**

**Ask about our comprehensive range of maintenance services for sports and play surfacing.**

Or, if you'd prefer to look rather than talk, give **[www.novasport.co.uk](http://www.novasport.co.uk)** a browse.
